Fund Overview

ICICI Prudential Mid Cap Fund is an open-ended equity scheme that seeks to generate long-term capital appreciation by investing predominantly in a diversified portfolio of mid-cap equities. In accordance with regulatory guidelines, the scheme maintains a minimum exposure of 65% of its total assets to mid-cap stocks at all times. The fund is benchmarked against the Nifty Midcap 150 TRI and primarily invests in companies whose market capitalization falls within the range defined by the constituents of the Nifty Midcap 100 Index – spanning from the lowest to the highest market capitalization among them.

SIP Performance

Lumpsum Performance

The fund has outperformed both the Nifty Midcap 150 TRI and Nifty 50 TRI across most periods, in both lumpsum and SIP modes, except for the 7-year lumpsum. The lumpsum investment delivered CAGR returns of 13.64%, 21.72%, 18.03% and 22.68% for 1-year, 3-year, 5-year, and 7-year periods, respectively. Meanwhile, SIP investments generated XIRR of 24.00%, 18.96%, 21.10% and 23.40% for the same respective periods. This broad-based outperformance across market cycles and investment modes reflects the fund manager's effective stock selection and portfolio strategy within the midcap segment.

The benchmark returns for Nifty Midcap 150 TRI have been calculated using the Motilal Oswal Nifty Midcap 150 Index Fund, while the returns for Nifty 50 TRI have been calculated using the Aditya Birla Sun Life Nifty 50 Index Fund.

Risk Analysis

Particular	Std Dev	Sharpe	Sortino	Beta	Alpha
ICICI Prudential Mid Cap Fund	18.59%	0.94	1.37	1.01	5.65%
Nifty Midcap 150 TRI	17.83%	0.66	0.86	1.00	0.00%
Category Average	17.74%	0.72	0.94	0.96	1.55%

The fund has a marginally higher standard deviation of 18.59% compared to the Nifty Midcap 150 TRI and the category average. However, this has been well compensated by the fund's superior risk-adjusted returns. The Alpha of 5.65% highlights the fund manager's ability to generate meaningful excess returns, while the Sharpe ratio of 0.94 is notably higher than both the benchmark and category average.

The Sortino ratio of 1.37 further suggests that the fund has managed downside volatility more effectively than its peers, despite a higher overall standard deviation. With a Beta of 1.01, the fund moves largely in line with the broader market — marginally higher than the category average of 0.96 — indicating close-to-full market participation rather than a defensive positioning.
